DETAILED ACTION

Remarks

1. In response to communications filed on 22-July-2003, Claims 1-6, 8, and 12 are cancelled, and claims 7, 11, and 13 are amended per applicant's request. Therefore, claims 7, 9-11, and 13-14 are pending in the application.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 7, and 9-10 are rejected under 35 U.S.C. 101 because they include non-statutory subject matter.

Claim 7, as amended, recites:

- "An internet address system introducing a zip code system, comprising:
- a top level aggregation identifier;
- a zip code field classified by the zip code system, the zip code field comprising a high level area code field for distinguishing high level areas, a middle level are code field for distinguishing middle level areas, and a low level area code field for distinguishing low level areas; and

a subscriber identification field which is a final identifier field."

Application/Control Number: 09/729,651

Art Unit: 2175

There is no clear definition in the "data structure" claim as to how the two entities relate to each other. A data structure claim should clearly indicate the inter-relationship of the functional elements of the structure. Appropriate correction is required.

Claim 7, as amended, also appears to be non-functional descriptive material, which is not stored on a computer readable medium. A claim must not be directed merely as "non-functional descriptive material", but must instead be either "a series of steps to be performed on a computer", "stored on a computer readable medium" or, "a machine or manufacturer for performing a process." Appropriate correction is required.

Claims 9 and 10 are rejected under 35 U.S.C. 101 because they are dependent from the rejected independent claim 7.

Allowable Subject Matter

- 4. Claims 11 and 13-14 are allowed over the prior art made of record.
- 5. The following is a statement of reasons for allowance:

The prior art of record, <u>Dunworth et al</u> (U.S. Patent No. 5,930,474), <u>Feldmeier et al</u> (U.S. Patent No. 6,289,414), <u>MeLampy</u> (U.S. Patent No. 6,311,186), <u>Kushita</u> (U.S. Patent No. 5,872,518), and <u>Kazunari</u> (Japanese Patent No. 408163173A) do not disclose, teach, or suggest the claimed limitations of (in combination with all other features in the claim):

Application/Control Number: 09/729,651

Art Unit: 2175

the hierarchical routing process further comprising:

a first step wherein a router of a high level area code hierarchy identifies a high level area code in the zip code system, and forwards to a corresponding high level area;

a second step wherein a router of a middle level area code hierarchy identifies a middle level area code in the zip code system, and forwards to a corresponding middle level area;

a third step wherein a router of a low level area code hierarchy identifies a low level area code in the zip code system, and forwards to a corresponding low level area; and

a fourth step wherein a router of a subscriber ID number hierarchy identifies a subscriber ID number, and routes to a destination identical to the subscriber ID number, as claimed in the amended claim 11.

Claims 13 and 14 are allowed over the prior art made of record because they are dependent from the allowed amended independent claim 11.

Conclusion

6. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Tony Mahmoudi whose telephone number is (703) 305-4887. The examiner can normally be reached on Mondays-Fridays from 08:00 am to 04:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dov Popovici, can be reached at (703) 305-3830.
